Skills

- Development Technologies: React.js, TypeScript, JavaScript (ES6+), Redux, Redux Toolkit, Node.js, Express.js, MongoDB, Redis, MQTT, Rabbit MQ, EMQX, CSS, Nginx, AWS lambda
- Programming Languages: JavaScript, python
- Libraries/Frameworks: JWT, Bootstrap, Tailwind CSS, Ant Design.
- Tools: Git, Figma, Postman, VS Code, Swagger, Gerrit, Redmine, AWS lambda and cloud watch, Alexa developer console.

Education

Bachelor of technology

Amrita sai institute of science and technology | May 2022

Dynamic Full Stack Developer with extensive experience in Smart Home, IoT, and Smart Monitoring solutions. Expertise in JavaScript, React, Node.js, MongoDB, Express, AWS, Redis, NGINX, and MQTT facilitates the creation of robust applications that meet diverse client needs. Proven track record in developing and certifying Alexa Smart Home Skills for third-party brands, ensuring seamless integration and functionality. Committed to building and optimizing scalable MERN stack applications with a strong emphasis on performance tuning, real-time data processing, and efficient data workflows.

Work history

Full Stack Developer

Quest Global [Client: JIO], Mumbai, Hyderabad | March 2023 - Current

- Developed responsive and scalable user interfaces using **React.js** and **TypeScript** for IoT device control, real-time monitoring, analytics dashboards, and event management.
- Built intuitive UI workflows for **device management, gateway interaction, automation control, and live status tracking**, improving user engagement and usability.
- Integrated frontend applications with REST APIs and real-time data streams to enable seamless device communication and instant status updates.
- Implemented reusable components and modular architecture in React, improving maintainability and development speed.
- Optimized frontend performance by reducing unnecessary re-renders, improving load time, and enhancing overall user experience.
- Developed and maintained **RESTful APIs using Node.js (Express.js)**, improving system efficiency by 40%.
- Optimized SQL and NoSQL database queries, reducing API response time from **800ms to 300ms**.
- Implemented **Redis caching**, reducing request latency by 50% and improving scalability.
- Supported both **monolithic and microservice architectures** for scalable IoT platforms.
- Managed production deployments using **Linux and PM2**.
- Investigated and resolved critical production issues by analyzing logs, debugging services, and collaborating with cross-functional teams, ensuring minimal downtime.
- Integrated and maintained **Alexa Smart Home Skills** for IoT products, enabling seamless voice control and ensuring certification compliance.
- Handled end-to-end Alexa activities including development, debugging, maintenance, and third-party brand integrations.

Activities and Interests

environmental conservation, art, hiking, cooking, travel, fitness

ACHIEVEMENTS

Awarded as standout performer of the Year 2024 for outstanding performance and contributions on JioSmartLiving products.
